DETAILED ACTION

Status of the Claims

Receipt is acknowledged of the Applicants' Response and Amended Claims filed on 2/29/08. Claims 1-8 and 10-23 are pending. Claims 1-5 and 12-20 remain withdrawn. Thus, claims 6-8, 10-11 and 21-23 are allowed.

Examiner's Amendment

Claims 1-5 and 12-20 are hereby cancelled.

Applicant elected without traverse the "process for producing" drawn to instant claims 6-8 and 10-11 in the original response filed on 4/8/05, and as such the claims 1-5 and 12-20 drawn to non-elected groups are cancelled. Since the "process for producing" claims are allowed, then the newly added claims drawn to the "product by process" are also allowed.

Response to Amendments and Remarks

Rejections-35 USC § 112:

Claims 6-8 are amended, thereby rendering the rejection moot.

Rejections-35 USC § 103: JP 09-268271 in view of 2002/014094 or JP 08-092484:

Claims 6 and 10-11 are amended, and Applicant has submitted a 132 declaration showing that the temperature at which the powder is heated is critical and that a

Art Unit: 1615

different product results upon heating at temperatures higher than that of 250°C taught by the prior art, thereby rendering the rejections moot.

Reasons for allowance

The following is an examiner's statement of reasons for allowance:

The prior art (cited as interest here) teaches lower ranges of heat treating silicone polymers: US 5,130,171 teaches that thermoplastic silicone copolymers are heated above 40°C but below 200°C (col. 2, lines 36-65). US 4,876,039 teaches that the silicone polymer is cured at about 50°C to 150°C (col. 14, lines 18-35). As such the art teaches away from heat treating above 200°C, however the instant claims are free of such art.

The prior art of record does not teach or suggest a process for producing a silicone-treated hydrophobic powder comprising the steps of: coating a surface of a starting powder with (1) a silicone compound having at least one Si-H group or (2) a mixture of the silicone compound (I) and a silicone compound not having an Si-H group, as a first step; and then heating the silicone compound coated powder at a temperature of 260 to 480°C for 0.1 to 24 hours, as a second step, whereby the Si-H groups of silicone compound (I) are cross-linked, wherein said silicone compound having an Si-H group is a Silicone compound having the formula (I):

wherein R₁, R₂, and R₃ independently represent a hydrogen atom or a C₁ to C₁₀ hydrocarbon group, which may be substituted with at least one halogen atom, provided

Art Unit: 1615

that R1, R2 and R3 are not simultaneously hydrogen atoms, R4, R5 and R6 independently represent a hydrogen atom or a C1 to C10 hydrocarbon group... of instant claim 6.

Therefore the claims are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 6-8, 10-11, and 21-23 are allowed.
